Junior Full-Stack Developer
SHAI SINAI

Tel Aviv, Israel | shaisinai4@gmail.com | LinkedIn.com | GitHub.com

SUMMARY

Fast-learning junior full-stack dev with a strong QA Automation background. Comfortable in **React/React Native + TypeScript** and **Node.js (NestJS/Express)**, integrating REST services, **Auth/JWT**, and basic GraphQL.

CORE SKILLS

Frontend: React, React Native, TypeScript, **React Navigation**, Axios, props, navigation, forms, error states
Backend: Node.js, **NestJS** (learning), Express, REST (CRUD), **Auth/JWT**, MongoDB, GraphQL (basics)
Testing & CI: Jest (strong), Playwright/Puppeteer (familiar), Mocha/Jasmine, **Azure DevOps** CI concepts
Dev Practices: Git/GitHub flow, code reviews, env management, **Postman** collections, API schemas, logging

SOFTWARE DEVELOPMENT EXPERIENCE

- **React Native – context-aware navigation fix:** Implemented logic that **reads the type from the API response** and navigates directly to the correct tab (React Native, Axios)
- **Frontend bug fixes & minor features:** Delivered **2 UI features** and **5 bug fixes**, including safe prop integration, small layout tweaks and null checks (React/React Native, Axios)
- **API integration (REST) & tooling:** Consumed **NestJS** REST endpoints with Axios; used **Postman** for request specs and example payloads; light familiarity with GraphQL queries
- **Auth/JWT (cert & labs):** Built a simple **Node/Express + JWT** flow during certification (protected routes, token refresh basics); validated with Postman and middleware logs

WORK EXPERIENCE

QA AUTOMATION ENGINEER @ Matzpen Unit (IDF) | *Jul 2024 - Present*
- Contributed to **React Native** app with bug fixes & small features
- Built and maintained **TypeScript** E2E automation with **Appium & Detox**
- Integrated **CI/CD** pipelines in **Azure DevOps**; validated backend APIs with **Postman** + **SQL**

QA AUTOMATION ENGINEER @ Hatal Unit (IDF) | *Jul 2023 - Jul 2024*
- Led **JavaScript** web automation framework (**Puppeteer**); **reduced flakiness ~80%**

FOUNDER & DEVELOPER @ E-Commerce Business (Self-Employed) | *Oct 2022 - Mar 2024*
- Designed and migrated platform **(Shopify -> WooCommerce)** with **full-stack integrations**

SEO SPECIALIST & ANALYST @ ClickIt | *Apr 2019 - Jun 2023*
- Hosted Zoom meetings, **teaching businesses** how to design and build websites (**WordPress, Wix)**

EDUCATION

Node.js, Express & MongoDB Certification – TESI (2025)
ReactJS Development Certification – TESI (2025)
QA Manual & Automation Certification – *Basmach (2023)*
